## Monitors Rank EBHS Highly

By Charles Cho

Six monitors, employees of the New Jersey Department of Education, completed monitoring of EBHS on May 15. Mr. Robert Flood, an assistant principal, was very pleased with the school as a whole.

The purpose of the monitors was to evaluate the school system, to point out areas of deficiency and to recognize achievements. The state monitors school districts at five year intervals. Not only the high school was observed; the junior highs and elementary schools were also monitored.

The monitors commented that the curriculum in EBHS was outstanding. They noted the wide range of Advanced Placement courses, and commended EBHS for offering fifth year foreign language courses. EBHS also offers a number of honors courses and courses for academic levels. The monitors were also impressed by the number of alternate education courses available.

In addition to the curriculum, the monitors considered the building's condition. Their inspection revealed few flaws. Their recommendations for improvement includ-

ed minor items which can be easily corrected (for example, chips or flaking in ceiling tiles which can be replaced). The science department was commended for its safe storage procedures; monitors who had been to EBHS in earlier years were impressed by the improvement.

The custodial staff planned for the monitoring since the fall. The building was inspected in October, and a list of maintenance jobs was prepared. The repairs made were very important, since the condition of the building, which was built in the late 1950's, was a matter of concern.

Mr. Flood called the preparation for the monitoring a "team effort." He recognized the teachers, custodians, secretaries, administration, and students for their efforts. The monitoring, he stated, brought the entire staff and studentry together.

Monitoring in this fashion was new to EBHS. Had EBHS not been seen favorably, the high school would be monitored annually and under closer scrutiny.

## S.A.D.D. Engages Speaker

By: Michele B. Hartmann

As Steve Booth said, "It can happen to you!" EBHS was fortunate to have a speaker like Steve on Friday, May 16, during periods 5, 6, 7, and 8. As he began his story, he did not lecture at the groups to which he spoke; rather he explained what can and what did happen to him as a result of drinking and driving.

On the night of July 30, 1984, Steve Booth was on vacation in Florida, while visiting his father, and was at a bar. While he was dancing, he spotted a cousin he hadn't seen in ten years. As he and his cousin started reminiscing, they continued to drink. His cousin then asked him if he wanted to have a Russian Qualude; he figured, why not, it's only one night. After about ten of these and ten Heinekens, it became bar closing time. It was 4 in the morning when they were asked to leave. They got into the car, with Steve as the passenger, and headed for Steve's dad's house. When they arrived there, they had a couple of beers, and at around 5:30 that morning his cousin said he knew of a great party where they were playing volleyball. As soon as Steve heard this, being a sports freak, he was ready to leave. Since it was so late, by the time they arrived at the party, it had been over for a little while. They decided to head home. It was a little misty out, but the view was beautiful. The sun was rising, and they were on a long stretch of highway that was parallel to the Gulf of Mexico. Before Steve knew what was

happening, his cousin gunned the engine.

The next thing he remembers is waking up and not being able to feel his legs. When he got to the hospital, there were many injuries to himself, but none to his cousin. Steve broke his back, had a collapsed lung, and had face and arm injuries. Along with this, there were monitors all around him, tubes in his nose and throat, and six more tubes in each arm.

He was unable to speak and spent seven-teen days on a rotating bed. He was then transferred from the Florida hospital to a hospital in New Jersey. Due to the high altitudes of the Mediplane he had taken, he was unable to receive medication for pain for the four hour plane ride. The first two hours of his trip were spent screaming and crying in agonizing pain.

After arriving in New Jersey, he was transferred to the Kessler Rehabilitation Center, where he spent ten days. He soon found out that he would have to have another operation where they would insert two metal rods, twelve inches long, into his back on each side of his spinal cord. He spent twelve more days in the hospital, and after being released, was sent back to Kessler. He spent seven months there learning such things as how to dress

## East Brunswick Public Schools East Brunswick, New Jersey 1985-1986 District Goals

- Ninth grade students scoring in the 40th percentile or below on the CTBS mathematics test will do better on the HSPT-Mathematics than similar students last year.
- The number of ninth graders scoring at or below the 50th percentile in the CTBS mathematics test will decrease to 12 percent of the total class.
- In participating elementary classrooms, the amount of independent, extra-curricular reading done by students will increase significantly.
- 95 percent of all sixth graders will demonstrate an understanding of ecology by using the scientific method in completing an independent field study.
- Ninth graders scoring in the 40th percentile or below on the CTBS language test will do better on the HSPT-Writing than similar students last year.
- The ninth grade class will achieve an average score of at least 85 percent on the sentence structure portion of the HSPT-Writing.
- The school district will attain State certification.
- The school district will improve the special education program and services.

## EXTRA SCRAP PAPER FOR THE SAT?

By Stacey Hoffman, Stacey Fanslow,  
and Loren Rosenberg

Some students who took the SAT on May 3, 1986, had more to worry about after the test than they did beforehand. Of the 605 people who took the SAT at EBHS, approximately 15 students received booklets with blank pages. With the realization that these booklets were defective, Mr. Fasciano, the guidance counselor in charge of administering the test, followed the instructions in the manual. He tried to find unused books with the same code number, but none were available. Therefore, he dismissed those students from their classrooms, as specified in the manual. Mr. Fasciano then attempted to get through on the ETS emergency number for over three hours, but was unsuccessful. This is because the defective booklets were a nationwide problem, affecting 8,000-10,000 people.

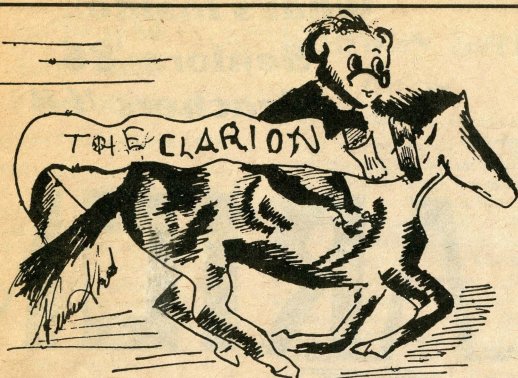

Although EBHS followed the directions in the manual, some schools did not. Instead, they allowed their students to finish the test, regardless of the missing pages, even though their scores would supposedly be invalidated. It was later discovered that the blank pages were allegedly part of the experimental math section. According to a report from Dr.

Sweeney, "It is the opinion of some people that ETS stated that these were experimental questions in order to mitigate criticism about the defective booklets."

ETS offered three options to those students with blank test pages: obtain a refund, retake the test free of charge on May 17, June 7, or June 8, or, for those who were allowed to finish, let their scores count. Unfortunately, students who were not permitted to finish their test do not have the third option. However, the first option is impractical to many of the students, because, as Lynn Milgrim states, "Refunds don't get you into college." In reality, EBHS students are only left with one option — to retake the SAT. In fact, any student who feels that the disruption during the testing jeopardized his or her scores, can retake the SAT free of charge.

According to ETS, the blank pages were caused by a printing error. Many think that booklets should be checked by the proctors, or even the students, before the testing begins. According to Mr. Fasciano, this is impossible because "it takes away the standardization of the test if they look through the book to check if something is wrong beforehand." If this is the case, ETS must devise an alternate solution.

## Give Us a Break

By Wendy Meyers

When the president was shot, when the space shuttle blew up, when the U.S. attacked Libya, the U.S. public knew of these events within minutes of their occurrence. The communication network of today far supersedes reporting during pre-Civil War days. Weeks and months used to pass before news reached all of the states or territories. Unfortunately, **The Clarion** faces a similar handicap that news sources faced during the 1800's. Although we have advanced technology and faster forms of transportation, we don't have the printing facilities at our disposal. **The Clarion** staff has continually been striving to decrease the time lapse between the assignment of articles and the distribution to the students. **The Clarion** has switched printers three times this year, looking for the quickest one. Unfortunately our attempts have been in vain. Our staff is

usually given one and one half weeks to gather information and write the articles. Then, the stories are proofread and sent to be typeset as quickly as possible. Often, two weeks pass before the articles are returned. The next step in the process is to lay out the paper, which is a time consuming job. Even if the staff does this in one afternoon, it is still an additional two to three weeks before the finished copy is returned. **The Clarion** tries not to turn a deaf ear on criticism about the lack of timeliness of the articles. We too face continual frustrations when an article on a new teacher comes out after the mentor has quit or a story on the homecoming game isn't printed until the end of the basketball season. Since **The Clarion** cannot get out articles while they're still current, we try to focus on feature stories. **The Clarion** staff feels that it was successful in doing its utmost to provide the student body with a worthy publication.

## A Clean Slate

By Debbie Bloom

As we seniors prepare to leave the sheltering arms of our alma mater for the great unknown and as the apprehensions involved with "facing life" mount, it is time to reflect upon the past and to prepare for the future.

The cruelty of rejection was dramatized in the college admissions process. To many seniors, the agony of wanting something very much, only to have it denied, has never before hit home with such force. Recovery from some of these blows and philosophical acceptance of reality will better prepare us for another unavoidable aspect of life: "You can't win 'em all."

For those whose parents have been over-protective, going away to school or the military will give them an opportunity to sever the umbilical cord. If it's a job you're headed for, it will be a chance to take an immediate place in the "real world" and achieve the special satisfaction of early

independence.

Most of us have avoided the pitfalls of drug and alcohol abuse. In fact, East Brunswick began its own chapter of the national organization SADD (Students Against Drunk Driving). For those who have not abstained and feel trapped, keep in mind that it is never too late to get help in combatting these twin temptations so prevalent in our time.

For those of us disappointed in love or friendship, a change in scene will undoubtedly offer new horizons. Students who have achieved sports stardom may wonder how it will go in college. As long as you're not tempted to rest on your laurels, hard work and determination should pay off.

Graduation is a mixed bag of tears and fears, anticipation and relief. We can view it as a perilous separation from the known, the secure, the proven — or as an adventure to be relished and digested, truly the commencement of the rest of our lives.

## Promises, Promises

By Kenny Lin

Question: What has the student council done recently? Besides the election of new members and the election of the student representative to the Board of Education, nothing much. What has the student council done all year? The general reaction to that question is "I don't know." Why? Earlier this year, the student council met to discuss the issue of parking. Now, the only indications of the student council's existence is the vandalism fuel gauge in front of the media center indicating the remaining funds of the vandalism grant from the Board of Education, the electronic bulletin board, and the school store. Besides that, nothing occurred that the average student would hear about.

It seems that people are joining the student council just for the sake of their transcripts. The consequences of that is a student council full of observers instead of doers. The result is a student council which serves the greedy few, via transcripts, and hurts the student body through the lack of services.

Of course, the executive board is not entirely blameless for the inactivity of the stu-

dent council. Since most of them are seniors, they generally lack the initiative to do anything because they already have been accepted to colleges. The inactivity of the student council betrays the trust of the student body since the executive board is formed by popular consensus.

Now, I am not accusing specific members of the student council of any wrongdoing; nor am I praising the student council for "keeping the course." Keeping the course is fine, but not when one can do better. Specifically, I am talking about a proposal made by a member of the executive board to purchase a new photocopying machine to supplement or replace the one currently in the media center. As we all know, the adjective for the machine presently in the media center begins with an 's.' So where's this new machine? It all boils down to this: it takes a great person to think of a good idea, but it takes a greater person to make the idea a reality. Keep that in mind, student council members. The future of the student body rests in your hands. And students, ask not what the student council can do for you . . . tell them!

## Welcome to the Big Top

By Alan Rose

State monitoring was a key phrase for the first two weeks of May as EBHS, led by its ever-efficient administrative staff, geared up for an inspection by the State Education Department. As often occurs among bureaucracies like ours, most attempts made at improving the school's appearance and the staff's morale were both late and ludicrous.

Two to three weeks before the inspectors' arrival, the men at the top had the custodial staff begin the rebuilding of EBHS brick by brick, door by door, and window latch by window latch. One worker summarized the atmosphere early in the proceedings by stating that if anything happened to the equipment he had just repaired, his bosses would "come after" him. At 7:30 p.m. on May 14, a group of custodians chuckled that if they were lucky, they might finish their prescribed jobs in a few more hours.

And what jobs they did! Repainting the Drama Club's prop room, replacing the rusted doors on the portables (which had been worthless for years), and putting up such signs as "DANGER-Boiler Room." Half of these tasks — the doors and windows — should have been completed years, or at least months, ago regardless of the inspection. Others — the prop room and signs — were projects that were basically busy work. The props cover so much of the floor that the new paint job barely showed, while the signs were more laughable than necessary.

Then there were the teachers, who received bushels of memos and booklets "RE: State Monitoring." They were told to rearrange their schedules and "Plan active instruction

lessons," while they had to submit accurate, complete plans for that day's lessons to the monitors.

A large booklet of "Informational Comments based on Items, etc. That . . . Teachers Should Know" was distributed to them. This booklet included everything from Special Ed to testing which the staff had to spout on command.

Teachers were also "offered" that they should supervise in the halls, enforce the lateness policy, and "Make an extra effort at preparing your classroom." This last was the most humorous to watch. Staff received yellow cards printed with the school's goals, which they had to post. (Many of them never knew that these goals existed.) They were also ordered to clear off the tops of file cabinets and desks.

All of these preparations were vigorously and carefully inspected on May 14 by our administrators. One classroom was checked by eight different people, each of whom missed two clear violations: the flag was rolled around its post, and a yardstick and pointer were perched atop the blackboard.

The final item our esteemed leaders "offered" was "RELAX! We have a good high school . . ." try telling that to the custodians who worked until twelve the night before the inspection, the teachers who had to memorize reams of worthless drivel (poor Phys. Ed. teachers), rantings about administrative orders. Not to mention the guy looking over my shoulder who had spasms when I read it to him. Congrats again P.T. Barnum et. al. on another "job" well done, and goodbye EBHS.

# Not Just a Piece of Paper

By Debbie Bloom

As graduation nears, an unsettling matter comes to mind: those people who will not be receiving diplomas. Maybe they dropped out because of financial hardship, peer pressure, drugs, pregnancy, problems at home, learning disabilities, frustration, or just plain laziness. Regardless of the reason, the important question is "What are we going to do about it?"

I know what you're thinking: "Dropouts? That's a problem for big cities to worry about. It couldn't be further removed from East Brunswick suburbia." While it is true that suburban dropout rates (12.8 percent of 1980 high school sophomores nationwide) are substantially lower than urban ones (18.1 percent of the same sample<sup>1</sup>), that 12.8 percent is nothing to sneeze at. The fact is that approximately one of every four eighth grade students nationwide will drop out before graduating from high school. This means 700,000<sup>2</sup> new dropouts every year face unemployment or minimum-wage "careers."<sup>3</sup> It means higher crime rates and thousands more welfare recipients. Most importantly, it means thousands of individuals who never have the opportunity to reach their potential — often due to circumstances beyond their control.

Well, someone has finally taken action. Last summer, delegates to the NEA Representative Assembly approved President Mary Hatwood Futrell's appeal for a national campaign to halve the dropout rate by 1990. The so-called "Operation Rescue," endorsed by NEA's National Foundation for the Improvement of Education, will provide \$700,000 in grants to local NEA chapters for

the purpose of establishing or improving dropout prevention programs. For schools who don't know quite how to go about beginning a program, a booklet called *Blueprint for Success*, to be available later this summer, will be a model for making each program effective. "Operation Rescue" does by no means solve this problem inherent in almost every school system — but it is definitely a strong first step.

On a brighter note, the US Department of Education has composed a survey, and the findings are indeed encouraging. Of the total number of dropouts from the early 1980's, 38 percent had earned a diploma by 1985, and another 13 percent were back in the classroom on the road to graduation.<sup>4</sup> Locally, East Brunswick's GED program encourages dropouts to continue their education, and many of their graduates even go on to college. After spending time in the "real world," many dropouts become ready to return to the classroom, and this program, with its strong teacher-student interaction, is ideal for their individual needs.

So, as you graduate, think about your personal achievement and bright future — but also take a moment to consider those who are not so fortunate, as well as those who have returned to the classroom and, against all odds, have succeeded in obtaining that vital piece of paper.

## JAP's Just Wanna Have Fun

To The Editor:

I have become aware of a certain race singled out in East Brunswick. However, this is not classical racism; EB has its own unique strain of humans. No, not ginkers, geeks, or gays; this sub-species is referred to as "JAP's". This term means no disrespect to our Asian friends. It is a simple abbreviation for "Jewish American Princess". They are not to be confused with "Valley Girls" who now survive only in parts of Southern California.

The major habitat of these females is known as "the mall". They can be seen in numbers as small as two, and in large groups at Italian Delight. They are almost never found alone, for once a JAP is by herself she has no one to constantly talk to in the very distinctive JAP accent and will soon lose her "JAPness". She may even stop shuffling or do something drastic like stop cracking her gum. They can most often be spotted in "Bam's", the Limited, or Panto Place, but very rarely in the Fashion Bug or, God forbid, J. C. Penney. When it comes to actual shopping, however, they often migrate to Woodbridge where "the mall" is more suited to their needs than East Brunswick's "mall". On the long journey, however, they may become tired of sitting in their Mercedes and settle for Menlo Park's facilities. The ultimate JAP may venture to New York City on the weekend in her never-ending quest for clothes. After casually browsing through Macy's or Fiorucci, she will come to JAP heaven: Bloomingdale's. Many people have been denied entrance to this exclusive area, so the interior can be described accurately only by a true JAP.

There is a dense JAP population in southern East Brunswick, an area called "Colonial Oaks" with ingenious street names such as "Redcoat" and "Valley Forge Drive" which refer to Revolutionary, not Colonial times, but that's not their fault. In this very confusing area of twisting roads, JAP's take their first driving lessons. This is an imperative skill for their lifestyle. Although the high school and the mall are both within walking distance, it upsets their tender feet to walk more than 200 yards in heels. You know, it's difficult to build yourself up in phys. ed. when you're wearing all that jewelry and trying not to get your designer sweats sweaty. Although their parents are

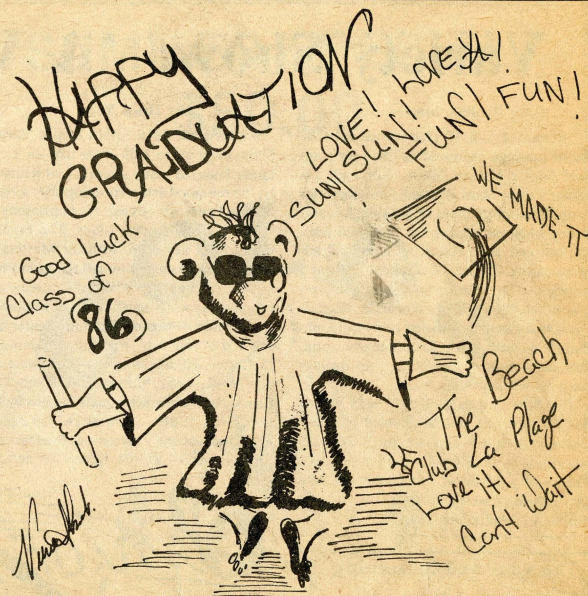

willing to pay for their limos (equipped with hi-fi and lighted make-up mirrors), it is customary to be seen driving or being driven to school, preferably starting when one is a sophomore. Most time at home is spent on the phone where they talk to each other as early as 6:30 A.M. and well after midnight.

A JAP may be forced to get a job by her parents. In fact, a high percentage of mall employees are JAP's, but not at J. C. Penney. Don't let their employment fool you though; they have inborn instincts which help them to find someone else to do their work for them. One second you're taking a ten-minute break and the next thing you know one of them looks into your eyes and turns up her cute little big nose and you're taking care of customers for her. Then, once her one and a half hour break is over, it's time to leave.

JAP's in training may start JAPping in elementary school, and must complete their training by high school. They may go through gallons of foundation and hairspray, and 1001 different colors of sweaters before they have their grooming habits down to an art. Imitation JAP's, sometimes called CAP's (Christian American Princesses), are abundant but are quickly recognized by their lack of Gucci bags or non-Foreza sweaters. Jewish American Princes, alias "JAP's" or "Guy JAP's", also have strange attire, but may be imitated by rich male non-JAP's. Guy JAP customs differ only by their bank accounts and mating habits.

The legend of the JAP has traveled as far away as Branchburg and is now heard of in sections of Pittsburgh. It has not reached Milltown yet, but ABC is planning a series called "East Brunswick Vice" starring JAP's as the police force. Most of the shoot-outs and drug busts will take place outside the arcade in the mall. The theme song is a toss up between Wham's "Everything she Wants" and Cyndi Lauper's "Girls Just Want to Have Fun," but both will appear on the soundtrack along with Don Henley's "All She Wants to do is Dance," ZZ Top's "Legs," Tina Turner's "Better be Good to me," Eddie Murphy's "Party All the Time," Sheila E.'s "The Glamorous Life," Dire Strait's "Money for Nothing," and Madonna's "Material Girl" and "Dress You up".

## Black Monday

By William Yu

Like any other day, April 14th came and went, but for this year's high school seniors, this day, half-facetiously dubbed "Black Monday" by *The New York Times*, arrived amidst immeasurable anticipation and left in its wake both triumph and trampled egos. Finally, it seemed, college decisions had arrived.

If you were a senior, you were accepted or rejected, successful or not. And if you were also like many students who feel pressured to achieve, you even believed that your college acceptances would seal your future. In retrospect, you remembered mailing out college applications in last-minute frenzy and fatalistically speculating on your chances. You remember the four-month long wait — an endless process of second-guessing yourself, of wondering if you had done everything possible to ensure acceptance to your dream college.

In light of this obsession, it is no wonder that juniors had sophomores also become caught up in the Great College Quest. As they submit themselves to the "who-got-into-where" litanies, jittery underclassmen try to decipher the enigma of a successful application. They formulate equations that must be balanced with a varsity sport here or a student government position there. So then, extracurricular activities loom like golden keys to Dream U.'s gates.

Often, the conclusion is to seek as many leadership positions as possible, to become

editor-in-chief, or club president, or class president, or even a chairperson of some obscure group. A second, but equally insidious conclusion, is to join, but not participate, in many activities.

Unfortunately, students who have reached these conclusions have also missed the point of extracurricular activities. They hurt their organizations and miss out on a chance to explore and experiment with interests that may not be the traditional ones. Perhaps the future filmmaker would derive a greater benefit from shooting short films for the A. V. Club than he would as a student council president, buying bushes for senior park. Furthermore, students sometimes don't realize that each college cannot be entirely filled with the Big-Man-On-Campus types. They would be much better off pursuing their genuine interests and talents.

Joining a club just to impress an admissions officer is also detrimental since the membership will become superficial. Without the genuine enthusiasm of members, an activity will soon become meaningless for even the sincere members. Faced with such a crisis, the club would just dissolve into an empty name for the students as well as for the application-hardened admissions officer. Thus, the hollow activity pursued for college's sake withers into insignificance for everyone, including the admissions committee that reviews thousands of such applications every year.

# Variety Show: A View From Each Class

By Julie Meyers

"Beware of Aides!" That seemed to be the major message expressed at this year's annual Senior Variety Show. Although the Senior Variety Show is aimed at raising funds to make the prom more affordable, it is also a time when the seniors can vent their frustrations and poke fun at teachers and administrators. Defying tradition, this year's scapegoat is surprisingly not the sophomores, but rather, the infamous hall aides. Numerous acts depicted the aides as overweight, unshapely women, lacking a college education, exercising military tactics to trap unwary students without hall passes.

The show, co-produced by Wendy Meyers and Debbie Fine and co-directed by Cheri Grand and Mike Spano, was an overall success, bringing in \$9,000 for the Senior Class. The faculty advisors, Mrs. Rosenthal and Mr. Topleski, were elated with the outcome but were "glad it was over."

By Helen Yoon

At least the 1986 EBHS Senior Variety Show lived up to half of its title — it certainly featured many seniors. Unfortunately, the few good acts were deluged by a flood of perfunctory jibes at sophomores, "JAP's," and teacher aides. The evening began on a key note, with the Masters of Ceremonies roaming through the auditorium to the strains of the "S\*W\*A\*T" theme and brandishing water machine guns. Following was a roller coaster of alternating entertaining and boring acts, with an abundance of the latter. Highlighting the show were the acts "You Look Marvelous," a spoof on Fernando, the character made famous by Billy Crystal, "EBHS Spymasters," an espionage film involving a mysterious briefcase and its contents — plastic figures of cartoon

characters Gumby and Pokey, and "Saran Rap," which featured typical nerds rapping about their various dislikes in school. As with any typical variety show there was an abundance of singing and dancing, some acts notably better performed than other routines. "Satan's Boys" was a laudable mockery of Heavy Metal rock stars, complete with cheering "ginkers" and frenzied female fans tearing various articles of clothing off the members of the band. Another praiseworthy act was "How Will I Know," with the participants in the act lip-synching and dancing to the popular Whitney Houston song. Other popular and deserving song and/or dance acts include: "Mr Cellophane," "Blues Brothers," "Boys," and "Masochism Tango." But more acts should have been cut, as the show ran over

a tiresome four hours, and although the finale of any show is usually the highlight of the evening, the one in the Senior Variety Show was not. The slide show which preceded the "Finale" was almost entirely comprised of pictures of the Variety Show participants. There was also some difficulty with the simultaneous music broadcast, which failed to be heard for most of the slides on Saturday night. The show finally ended with a swarm of people gathering on stage to croon some undecipherable lyrics supposedly to the tune "You've Got A Friend." Hopefully next year's show will take a lesson from this year's, and will eschew much of the fluff acts that helped to clutter and lengthen the show.

## Senior Variety Show

By Kenny Lin

As you may know, no story is complete from one viewpoint. The previous article is written from the viewpoint of a member of the audience. The following is written from the viewpoint of a participant.

First off, the comment regarding the lack of variety in the show is but one's opinion. The show featured various talents ranging from comedians to jugglers to dancers to singers to even composers. Generally speaking, that is a broad range of talents.

It seemed that the highlights of the show were the reviewer's favorites. However, her view does not necessarily represent that of the audience. Several acts which the audience enjoyed were totally omitted from the article. For example, the act "We Got Balls" by Todd Girshon and Ronn Goldberg featured impressive juggling of balls, pins, eggs and even a bowling ball. Basking its humor on word playing and gym teacher impersonations the act was well received. The "Schrager/Hart Morning Make-Up" begat howls of laughter as a JAP, portrayed by Steve Schrager, was made up and prepared for school by her "hands," Larry Hart. The Pee-Wee Herman rendition by Jimmy DeSimone received more than its share of applause on Friday and Saturday nights when the act ended in a "bike-off" between DeSimone and guest star "Crazy" Mike Pacholek. The exaggerated portrayal of teacher-aides in various acts such as "Aides" and "Stop! Do You Have A Pass?" was enjoyed not by the audience alone, but by the teacher aides themselves. For several days after the show, the teacher aides could be seen chanting "Where's your pass? Get to Class! Detention! Ha! Ha! Ha!" and "Stop! Do you have a pass? Have you been cutting class?"

Admittedly, the show ran long, but the length of the show was mainly due to the multitude of talent in our school. The reviewer was partially right about one thing, that some acts should have been cut. It is true that some acts fell short of their potentials, but that is to be expected in any variety show whether it be the Senior Variety Show or even Saturday Night Live for that matter.

Any trouble with the sound system this year was nothing compared with the difficulties last year. Testing the patiences of many, the sound system failed before, during and after the acts last year. By contrast, the only significant problem with the second sound system this year came during the slide show on Saturday night when the difficulties with the tape player arose.

Admittedly, some acts were boring, but on the whole, the variety show was worth the past-midnight rehearsals. A lot of hard work and time (and missed classes) went into this effort. Any time a large group such as the cast can sing together in unison can be considered a monumental achievement. It would be almost impossible for such a large group to sing "You've Got A Friend" in a manner one is accustomed to hearing on the radio. The rendition of "You've Got A Friend" was average at best, but contrary to the review, the lyrics weren't exactly "undecipherable." Were there a hall-of-fame for Senior Varsity Shows, this one would undoubtedly be a shoo-in.

Admittedly, some acts were boring, but on the whole, the variety show was worth the past-midnight rehearsals. A lot of hard work and time (and missed classes) went into this effort. Any time a large group such as the cast can sing together in unison can be considered a monumental achievement. It would be almost impossible for such a large group to sing "You've Got A Friend" in a manner one is accustomed to hearing on the radio. The rendition of "You've Got A Friend" was average at best, but contrary to the review, the lyrics weren't exactly "undecipherable." Were there a hall-of-fame for Senior Varsity Shows, this one would undoubtedly be a shoo-in.

## The Year...

Before the 1985-86 school year comes to an end, the **Clarion** would like to recognize spectacular achievements of school clubs and individual students.

... The Key Club, a community service organization, and one of the largest clubs in the school, continued its commendable work this year and received a proclamation from the mayor. The Key Club raised \$4,800 in the Leukemia Bowl-a-thon and \$3,700 for cystic fibrosis in the volleyball marathon, all-time highs for both fundraisers. At the annual convention in the Poconos during the weekend of April 19, Scott Lewin received an award for his outstanding work as secretary, and Brad Muro was recognized with the outstanding President Award. The Key Club was also awarded the "Dues On Time" award. Officers for the 1986-87 school year are: President-Perry Herman, Vice President-Scott Davis, Secretary-Scott Lewin, and Treasurer-Matt Maycott.

... The Math Team placed first in the Central Jersey Math League, and three members placed in the top ten, individually. Team members are David Bitko, Gordon Bitko, Debbie Bloom, Charles Cho, Sanjiv Kinkhobwala, Arun Sannuti, and Eric Streisand.

... The EBHS science teams have placed very well in the state. The Physics I team placed third in the state; the Physics II team placed second; the Chemistry II team placed first; and the Biology II team placed eleventh.

... Three EBHS juniors have been accepted to the Governor's School for this summer. This program, established by Governor Kean three years ago, is designed for outstanding juniors recommended by their guidance counselors. Programs are offered in arts, science, and public issues. Julian Hsiang and Andrew Zimmerman will attend the School for the Arts at Trenton State, and Gordon Bitko will attend the School of Science at Drew University.

... After the induction of eighty-two members into the National Honor Society, the following students were elected to offices: President-Jeff Goodman, Vice President-Brian Kaplan, Secretary-Heather Akawie, and Treasurer-Stacey Swaika.

## In...

... Congratulations to Coach Tighe and the Boys' Track team for its 200th dual meet victory, which came against Woodbridge on May 14th. With the season ending victory against St. Joe's, Coach Tighe has amassed 201 career victories as head coach of the Boys' Track team at EBHS with only forty defeats.

... The Drama Club presentation of **How I Survive High School** was awarded in Middlesex and Monmouth County Colleges as "Best Overall Show" and "Best Group Performance". Also, the production of **Murle Mavis** was performed at Bucks County Playhouse in New Hope, Pennsylvania. The one hour long show was taped by Channel Eight.

... Next year's student council executive board consists of: President-Allison Busch, and Vice-Presidents Brian Kaplan, Ken Novak, Eric Runyon, and Dan Simon.

... David Schumann and Joe Borruso won the N.J. Young Playwrights Award for their play, which will have a professional staged reading at the Whole Theater Company, in Montclair on June 13.

## S.A.D.D. News

By Betty Ouyang

June will mark the end of the first school year that a SADD chapter has been successfully established in East Brunswick High School. Under the direction of President Lindsay Schiappa and Vice President Eric Harrison, SADD has sponsored two fundraisers, including the sales of buttons and bumper stickers. The group has also been responsible for bringing guest speakers to the school. (Recently, Steve Booth was invited to speak to the students,) as well as presenting programs such as "You Drink, You Drive, You Die" during the lunch periods. When the committee was first formed, the members had simply hoped to spread awareness of the tragedies resulting from driving drunk. "Through active involvement, we hoped to make students think twice before drinking and driving," says President Lindsay Schiappa. Lindsay, herself, has been elected to the Middlesex Council on Alcoholism to help distribute signs throughout the community. As for the future of SADD, she hopes that more SADD chapters will form in other townships and that membership in our own school's chapter will also increase.

## Young Politicians

By Aline Lin and Francis Lee

Many students are afraid to get up in front of a group of people to express their feelings. Others want to be politically involved because they feel strongly about a particular issue, but they do not know how to convey their arguments. Seventeen years ago the federal government funded the program IPLE (Institute for Political and Legal Education), with the intent of educating the young generation about how the United States government functions.

Soon after this unique program was initiated, the federal government discontinued the funding which provided learning materials for IPLE classes in many states. Despite this action, many of the programs have survived and made progress through the efforts of supporters like Mr. Calimano. During class, mostly federal issues are debated. Unlike many courses, where the teacher lectures endlessly, IPLE leaves the talking to the students, who follow congressional procedures in order to have a better sense of governmental duties.

Another unique aspect of the course is the rewarding activities. Eighteen hundred students from sixty schools met in New York City from March 26 to March 29 to participate in the National High School Model United Nations Competition. The schools represented different countries and presented resolutions on international issues. Research, hard work, and long hours of preparation have paid off for EBHS IPLE students, who

received an Award of Distinction in the competition as Peruvians: Jeff Beenstock, Steven Beenstock, Steven Bloom, Chris Bonanos, Seth Cohen, Mike Daughenbaugh, Dana D'Arienzo, Dan Goetz, Todd Girshon, Michele Hartman, Lenny Kaplan, Kathy Kempner, Suzanne Kolsky, Neil Lapinsky, Kenny Lin, Jay Miller, David Mundis, Kim Natoli, Andy Rochester, Mark Selinger, Steven Tepp, Allen Ty, and Scott Weber. Model Congress was another event where EBHS "Iple-ites" succeeded. On March 20, 21, and 22 at Stockton State College in Pomona, New Jersey, approximately 450 students from twenty schools met to debate national issues and write legislation. The following students won awards: Scott Weber, Best Chair Overall; Eric Harrison, Best Committee Chair; Allen Ty, Best Party Leader/Stripes Party; Karen Weissman, Ian Hewins, and Dave Mundis, Best Legislation.

IPLE was unfortunately limited as to the number of activities in which it could participate because of the great deal of time devoted to each competition and the tremendous expenses, which can sometimes run up to four hundred dollars per student. Perhaps next year, they will be able to tackle other competitions such as Mock Trial, which delineates a fictional court case. From his course, Mr. Calimano hopes that his students will gain self-confidence and an appreciation for debating.

## SADD

(continued from Page 1)

and things most people take for granted.

In his talk he said the hardest thing in his whole life was the rehabilitation he had to go through. When he was first in the hospital, he didn't realize how serious the accident had been. He figured that he would be fine in a couple of weeks. He soon found out this wasn't true. Because of the one night of stupidity and indulgence, he lost everything. He could no longer live in his apartment because he couldn't climb the stairs. His sportscar became non-accessible, and he lost his job as a photographer with the *Star Ledger* because he couldn't get to the sports players. Steve describes his life as "a living hell." To this day, he wakes up during the night and cries when he sees the wheelchair.

Steve doesn't condone drinking and stresses that there are alternatives to drunk driving. Make sure you don't get into the car with a drunk driver and don't drive drunk. If you have to, stay at a friend's house or find another way home. His favorite alternative is the "designated driver". It is a good idea for those who drink and could help to save their lives or the lives of others.

As Steve said, "I'd much rather be using my feet," and most people would agree with him. During the time after the accident he

thought about suicide only once, but felt it would be selfish of him to go through with it because his family loves him and needs him; luckily he realized this before it was too late. After this, the thought never crossed his mind again, and he is mentally up and happy to be alive today.

Steve Booth now earns his living by talking to schools, clubs, and other organizations. The point he is trying to get across to his audience is that you should not drink and drive. In New Jersey alone, 150 high school teenagers will die this year, and many others will be seriously injured due to drinking and driving related accidents. As he says, "Get a head start and become your own person now, rather than waiting until later on in life when no one will care about your clothes and your hair any more."

Even though the media instruct us not to drink and drive, Steve came across clearer, one reason being that he did not lecture the students; he did not scold or tell them what to do; he showed them living proof of what can happen. This was realistic because it was on a personal level and not just seen on television or heard on the radio. Steve once thought, "It could never happen to me," but he now says, "Remember, it CAN happen to you!"

## Soft-squad Lays Solid Foundation

by Ling-Ling Tung and Alyssa Ashley

"Wait till next year!" That seems to be the rallying cry for the EBHS Bears Softball Team. The reason for this does not seem to be apparent at first glance. One looks at this potent line-up led by seniors Sandy Massing in centerfield, Lauren Meyer at third base, and Kathy Kuchler behind the plate, all with three years of experience. Then, there are juniors Stacey Swaika, the varsity first baseman, and Gail DiMartino, the Bears' #1 pitcher, already with three years of experience under her belt. However, a second glance at this softball team will point out the relative inexperience that has held them back. Of the twelve regular varsity players, seven have had no previous experience playing in the high school softball circuit. These seven new faces include one junior, five sophomores, and one freshman from Churchill Junior High.

The team, despite its inexperience, has recorded many strong outings and has made a decent showing in the conference. Sandy Massing comes up with an explanation for this: "This team has little experience, but it has determination to be one of the best teams in the county." In doing so, they have qualified for the state softball tournament. This, and the experience gained by the present team should provide a solid foundation for the coming years.

## Beached Bears

By Michele B. Hartmann

Newly formed this year, the EBHS Beach Bears Winterguard did well for their first season in competition. They were only able to compete in three competitions this season. The first one they attended was at South Brunswick High School on March 22. The second was at Ramsey High School on April 12, and the Championship was held at Brentwood High School on Long Island on April 26.

They came in second place at South Brunswick with a score of 83.9; they placed first at Ramsey with a score of 82.0 and also placed first at the championship competition at Brentwood with a score of 91.7. These scores were all out of a possible one hundred points. Scores were based on equipment work, movements, ensemble analysis, and general overall effects.

For their first year in competition, they performed well and are looking forward to having an even more successful season next year.

This year's team members were: Nicole Ayers, Jean Cho, Cindy Churak, Lyn Creegan, Donna Curran, Eddie Gahrman, Kathy Gamble, Michele Hartmann, Margaret Johnson, Susie Kahle, Lori Larson, Laurie Sedlazeck, Lora VanSlyke, and Deanna Watrous.

## Subway Series

### Part Two

By James Toto and Jay Lubowsky

With the best pitching staff to come around in generations and the most powerful offense in their history, first place should be a cinch for the New York Mets in their division of the National League. The Chicago Cubs will be fighting till the bitter end if they can keep ace pitcher Rick Sutcliffe healthy. The Montreal Expos' potentially great, yet inconsistent, roster of Raines (.320 BA, 70 stolen bases), Dawson (23 HRS), and Brooks (100 RBIS), just can't pull out of their third place rut. Last year's champions, the Cardinals, will come in fourth. Willie McGee (.353 BA) and Tom Herr (110 RBI) can't have great seasons all the time. The Phillies' off-season trades will not give them what they need to contend strongly, and neither will Mike Schmidt (.277 BA, 33 HRS). Last, and also the least, the Pittsburgh Pirates will once again finish in last place. Their slim offense of Ray (.274 BA), Pena (10 HRS), and Bream (.230 BA, 6 HRS) cannot quite compete with even the most mediocre pitching staff.

In the West, the phenomenal pitching staff of the Los Angeles Dodgers will once again emerge victorious in their division. Finishing a close second will be the Cincinnati Reds. Although they have a beefed-up pitching staff, and a potential power house, Dave Parker (.312 BA, 34 HRS), the question in my mind is, will the once great Pete Rose finally relieve himself of first base chores? The Atlanta Braves will finish third, with new Skipper Chuck Tanner at the helm. The rapidly declining Astros, who have never seen a pennant, will have to wait a little while longer, as will their fans. I don't think that their players can wait that much longer before they retire. The San Francisco Giants, who last year had the first 100 loss season in club history, will probably repeat this record-breaking feat this year. Their offense is pitiful, and their pitching is very average. At least the Padres will keep the Giants from falling into last place, for they have already taken that position. Tony Gwynn just can't pull a team with an unproductive pitching staff through another season.

Our MVP choice is Dale Murphy of the Atlanta Braves. Last season, he batted .300 with 37 home runs; yet the club still came in last place. If he finally does pull the team up from last, then it will be his third MVP Award.

Not surprisingly, We chose a NY Met as Rookie of the Year, versatile Kevin Mitchell, who played third base in the Minor Leagues, batted .281 last season, and hit 9 home runs in 347 at bats. Nicknamed "747", he weighs in at 210 pounds and could be the next hitting machine for the Mets.

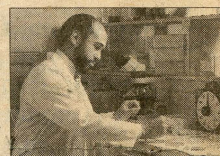

The Cy Young Award will once again go to pitching phenom Dwight Gooden, while Expo Tim Lincecum will finally receive some recognition by leading the league in batting average.

## COLLEGE IN NEW JERSEY

*It worked for me!*

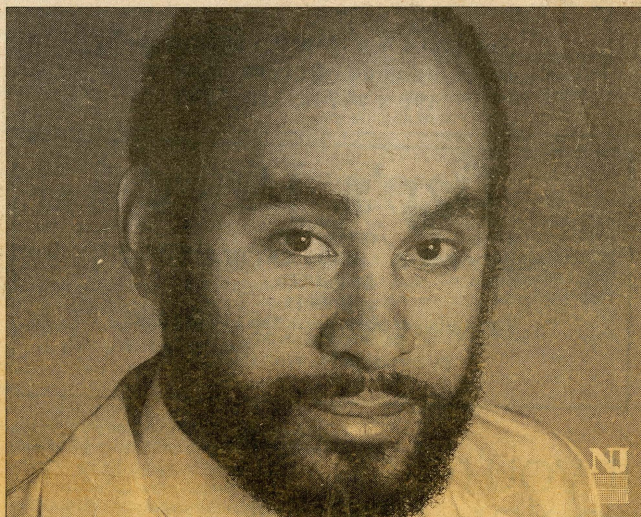

"My college experience can be described in three words—quality, choice and affordability. The strength of my New Jersey college education gave me the knowledge and direction I needed to develop an important medical device. Today my invention is helping surgeons save lives."

*Cecil Broadnax*
